Well I have played only about 30 minutes of the game, I say for a first time developer and publisher, AS Games did a great job. Considering the price it is well worth it. Like most games I feel that its not super different from any other but it is fun to play. Though i get frustrated already at the beginning. The con for this game is that i find that you side scroll faster than going forward which i used to my advantage later in the game. Overall, for the price of the game and what you get out of that I do recommend this game.
